About us

Mulcol International is a modern manufacturer of innovative passive fire stopping products. Our fundamental objective is to manufacture and test pragmatic, effective and assembly-friendly products and solutions in accordance with the most recent European standards.

Pragmatic, effective and assembly-friendly solutions

Mulcol International continuously researches, develops and tests practical solutions and products in order to offer our customers the best passive fire safety products. Our aim is to develop innovative fire-retardant products and solutions that are relevant and easy to use. Instead of testing theoretic solutions, we feel that we have to gauge if our tested products can be used in practice and reflect real situations.

Excellent quality

Mulcol International has only one goal and that is to offer products of an excellent quality, designed for our safety. We want to be market leaders in manufacturing and supplying the best performing passive fire protection products. Mulcol International exclusively focuses on sophisticated technologies and our expertise with regard to the character of our products. We focus on expanding the performances and characteristics of the existing range of passive fire safety products.
